SCHEDULER EXPERT

Effective
workforce solutions

Scheduler Expert

Advanced solutions for workforce scheduling management

Scheduler Expert is a proven success: since its launch in 1992, it has become a high-performance system, which has seen many improved versions developed to further meet the strategic business needs of our clients.

Scheduler Expert is an integral system designed specifically for workforce scheduling in all areas of organisational operations. It brings about automation of processes and, once integrated into your other systems, it will significantly improve your performance.

With Scheduler Expert, you will rise to the daily challenge of finding a balance between your owners' requests, your customers' expectations and your employees' satisfaction. Its innovative tools will help you with your tasks such as optimising workplace coverage, assigning your employees to various roles, recording attendance, managing employee database, forecasting workload demands, and much more.

Input

People files

- Roles
- Skills and licences
- Shift and pay rules
- Contract data
- Preferences and swaps

Business hours of operation (Staffing requirements by skill)

- Event plans
- What if analysis
- Labour strategies

SE basis

- Scheduling rules
- Organisational structure and practice
- Workstation properties
- Prohibitions & orders

Data import

- Time and attendance
- Enterprise resource planning
- Business applications

Output

Optimal daily assignments

- shift schedules
- annual leaves
- training
- sick leaves
- business trips
- other activities

Payroll summaries (timekeeping)

Reports & analysis

Data export:

- Payroll systems
- Enterprise resource planning
- Business applications

Owners

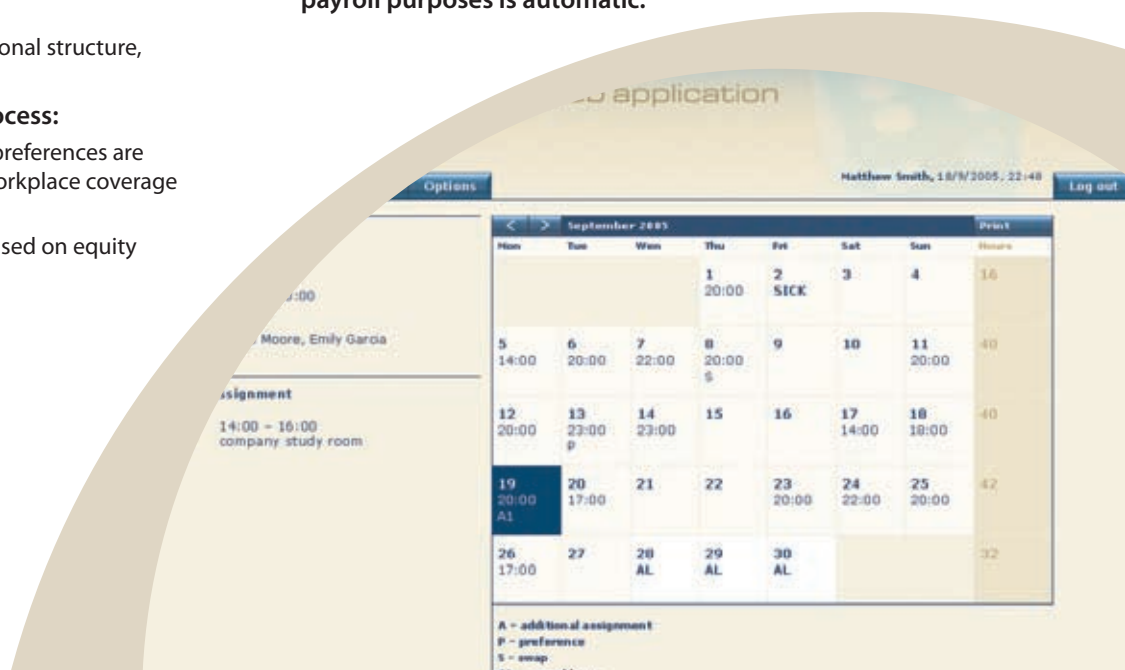

- **Cost reductions and improved customer service:**
 - scheduling time usually decreases by up to 70 percent
 - schedule cost usually decreases by 10 to 30 percent
 - timekeeping effort for payroll purposes usually decreases by up to 90 percent
 - overtime work decreases
 - employee quality of life improves
 - paper and archiving cost is minimised
- **The best return on investment due to the application's fast implementation, sophistication, benefits and competitive price.**
- **A tailor-made solution to meet the strategic business needs of any business.**
- **Experienced consultants are available for advice, implementation, and training.**

Managers

- **Long time series of data and interfaces with other areas of your business enable forecasting, analysing and fully informed decision making in the field of workforce scheduling and management. E.g., Scheduler Expert will enable your managers to plan workplace coverage, annual leaves, training, etc. well in advance.**
- **Scheduler Expert allows real-time control of workplace coverage and actual versus planned attendance/absence, thus assisting your managers in making last-minute changes to schedules.**
- **Scheduler Expert has a variety of predefined but fully customisable reports to assist your managers.**

Schedulers

- **All built-in schedules, which are fully customisable, will be designed taking account of normal business practices, local labour legislation and client-specific rules.**
- **Schedule creation – input:**
 - workplaces (staff requirements) for normal business days, holidays, special event days, seasons, etc. (workplace properties, tasks to be performed, required skills)
 - employee properties/database (personal data, roles, shift rules, preferences, skills, licences, etc.)
 - work standards (organisational structure, scheduling rules)
- **Schedule creation – process:**
 - employee properties and preferences are optimally matched with workplace coverage requirements
 - automatic scheduling is based on equity
 - sickness and annual leaves, but also meetings, training, business trips and other appointments are easy to manage
 - manual scheduling or changes are always possible
 - a powerful searching tool quickly finds employees most suitable to balance overstaffed or understaffed areas
 - employees can be assigned to different departments within one business or even to another business
- **Time tracking and export of data for payroll purposes is automatic.**

Joker - casino edition

Medic - health care edition

Icarus - airport edition

Administrators

- User permissions are very flexible to define. Each function has read, edit and print options. Standard groups of permissions such as manager, scheduler, timekeeper, and employee can be modified.
- User access and data changing is tracked.
- Settable SMS or E-mail notifications remind users about missing documents, schedule changes and expiration of contracts, licenses, etc.
- The application is easily interfaced with HR, time & attendance, payroll, and other applications.

Employees

Secure and easy to use self-service tools give them instant web access to the system:

- they can view detailed and accurate information on assignments
- they can view and print hours worked summaries
- they can send messages regarding their shift, days-off, etc. preferences, shift swapping, etc., as well as confirmations
- a virtual notice board enables them to communicate with their managers and colleagues
- SMS, E-mails or notice board postings remind them of any changes to the current schedule, missing documents, training and other appointments
